

Kalina the Bio Cooperage 2022 – Kalina Barrel Ltd.

For our top organic products, everything is built on traditional principles. No harmful substances affect the barrels from the outside or inside. In this case, the natural effects of wood may occur during use.

Kalina uses 100% Premium Quercus Petraea sourced from the southern slopes of the Central European mountains in northeast Hungary for all barrels. We don't use any chemicals, glues or pastes.

Oak logs are split, then sawn, and open-air seasoned for a minimum of three years.

Toast levels: Light (L), Medium (M), Medium Plus (M+) and Heavy (H) and Tasted Heads (TH). Char levels by spirits: C1-C4

Prices of barrels for 2022 – in EURO
